Hong Kong : Asia's Premier Asset & Wealth Management Centre

Hong Kong is the gateway to 4.32 million high net worth individuals (HNWIs) in Asia Pacific, the region with almost one-third of HNWIs in the world. The accumulation of wealth and foreign exchange reserves in Mainland China and in many parts of Asia has generated strong demand for world-class asset management services in the region. In this session, distinguished speakers from different parts of the asset and wealth management value chain will discuss how Hong Kong is the ideal platform for funds to explore investment opportunities in the region and manage Asian capital, along with the advantages that investors and corporations can gain by diversifying their investment portfolio through the Hong Kong platform.
