

FSDC Practitioner Speakers Series - Demystify LegalTech and RegTech

Technology advancement is altering the landscape of financial industry on diverse interfaces. These dynamics provide a fertile ground for the emergence of new business behaviours which demand creative strategies and innovative thinking in getting things done. Of such advancement, “LegalTech” combines legal services with technology to distribute legal advice in a more effective and efficient manner through online communication and artificial intelligence, while “RegTech” puts together regulatory activities and technology to streamline the complex risk management processes with analytical software and big data. In this session, you will learn more about what LegalTech and RegTech are and how they are revolutionising the traditional financial market.
